

**Parent Awareness:
Students and Texting and “Sexting”**

Students and Texting and “Sexting” is becoming commonplace among adolescents and teens. The district would like to make parents aware of the danger. Please review the attached links for some background on these issues. The cell phone activity can have criminal repercussions for children and adults, particularly when someone holds onto images or passes them along. These activities along with images in face book accounts can effect employment opportunities and college admissions. Be aware and talk with your children.
