

SAUCON VALLEY SCHOOL DISTRICT

Network Guidelines

The Saucon Valley computer network was created to provide a means to access information resources within the district and around the world. The use of the network must be in support of education and research and be consistent with the educational objectives of the district.

The following guidelines are provided so that users are aware of their responsibilities.

Privileges - The use of the network is a privilege not a right, and inappropriate use will result in a cancellation of those privileges.

Security - Security on the network is a high priority. Do not use another individual's account. Do not seek information about, obtain copies or modify files, other data, or passwords belonging to other users. Do not use individual disks on any networked computer. Attempts to login as a system administrator or the violation of any security guidelines will result in cancellation of privileges.

Vandalism - Vandalism is defined as any malicious attempt to harm or destroy data of another user or hardware or software associated with the computer system. This also includes the creation or transmission of computer viruses. Vandalism will result in immediate cancellation of privileges.

Copyright - The illegal use of copyrighted softwares-including copying, uploading, downloading, or unauthorized use-is prohibited.

For more detailed information, refer to Saucon Valley School District Policy #815 Acceptable Use of Internet.
